

Microwave Flower Drying Equipment

Specifications :

Price	USD 8,800.00
Brand Name	LOYAL
Model Number	LY
Place of Origin	China
Min.Order Quantity	1
Payment Terms	T/T
Supply Ability	30 sets per month
Delivery Detail	25-30 working days
Packaging Details	Wooden packages

Detail Introduction :

Microwave Flower Drying Equipment

In the world of flower processing, efficiency and quality preservation are paramount. Shandong Loyal Industrial Co., Ltd. introduces cutting-edge Microwave Rose Flower Drying Equipment, powered by rose flower Industrial Microwave Systems, to revolutionize the flower drying process.

Our Microwave Rose Flower Drying Equipment utilizes advanced flower microwave heating technology to ensure uniform drying of rose flowers. Unlike traditional drying methods, our equipment targets water molecules within the flowers, resulting in faster and more efficient drying while preserving the natural color and fragrance.

What Is The Principle Of Microwave Rose Flower Drying Equipment?

LOYAL'S MICROWAVE ADVANTAGES

Microwave drying operates on the principle of utilizing microwave radiation to agitate water molecules within a material, causing them to rapidly oscillate and generate heat through friction. This localized heating accelerates the evaporation of moisture from the material, resulting in drying. The microwave energy penetrates the Rose Flower and selectively heats the water molecules, allowing for efficient and uniform drying compared to conventional methods.

At the core Chamomile Flowers Continuous Microwave Dryer of our flower microwave heating technology lies the principle of rose flower Industrial Microwave Systems, which selectively heats the moisture within the flowers without overheating or damaging the petals. This ensures that the delicate characteristics of the flowers are maintained, resulting in high-quality dried roses.

With our rose flower Industrial Microwave Systems, flower producers can achieve consistent and reliable drying results. The continuous drying process allows for large-scale production while maintaining the integrity of the flowers.

Rose Flower Industrial Microwave Systems VS Gas Dryer Comparison

1 Rapid heating, safe and environmentally friendly, sterilization time period, fast Save energy and heat evenly and thoroughly.

2 Timely heat control, sensitive response, strong microwave heating penetration ability.

3 High voltage power supply for microwave oil cooling Suitable for any environment long lasting Energy saving and environmental protection.

4 Use the dedicated high-voltage power supply for microwave air cooling in a dust-free environment long lasting Energy saving and environmental protection.

5 Microwave waveguide has long corrosion resistance and long service life.

6 Cooling fan, good heat dissipation effect.

Experience the benefits of Microwave rose flower Drying Equipment from Shandong Loyal Industrial Co., Ltd. Our equipment offers precise control over the drying process, ensuring that each flower is dried to perfection. Say goodbye to uneven drying and hello to consistently high-quality dried flowers.

DETAIL CHARACTERISTICS

01 ENVIRONMENTAL POLLUTION-FREE

Microwave drying equipment does not produce environment of high temperature, dust and noise, without waste water and exhaust gas in the process of operation, no waste is generated.

03 ADVANCED TECHNOLOGY EASY TO CONTROL

Microwave heating just have the basic conditions of water, electricity, as long as control power of microwave which can realize the automatic control of heating process immediately.

HEATING UNIFORMITY

02

Material can generate heat at the same time under the action of electromagnetic waves from microwave, there will be no coke endogenous phenomenon.

SMALL FOOTPRINT SAFE AND HARMLESS

04

Because the microwave energy is control in metal heating indoor and work in the waveguide tube, so rarely microwave leak, no radiation damage and harmful gas emissions, and does not produce waste heat and dust pollution.

What's The Advantages Of Microwave rose flower Drying Equipment?

Why Choose Loyal rose flower Industrial Microwave Systems?

1	The Insulation Boards Of rose flower Industrial Microwave Systems Are Knocked-Down, So It Is Very Convenient To Replace Them. It Has Fallen Down On The Continuous Microwave Oven's Layer.
2	The Continuous Microwave rose flower Drying Equipment Is Fully Automatic. You Can Adjust The Electrical Control Content And Temperature To Demand Your Requirements.
3	The Speed Of The Mesh Belt Is Constant To Keep The Final Material Drying Highly Uniform.
4	Chamomile Flowers Continuous Microwave Dryer Is Featured With Low Labor Invest. The Operation Of Dryer Can Be Done By One Worker. Moreover, With Specialized And Compact Design, Our Belt Dryer Has Less Occupied Area.
5	Industrial Chamomile Flowers Continuous Microwave Dryer Can Reduce Power Consumption. All Working Process Is In A Closed Environment To Lower The Heat Loss.
